*Problems 2002:*

- 1. Summer overgrowth can be a problem particularly on some parts of the Hutton Hike and the Rudston Roam. Spring and early summer give the easiest walking.*
- 2. A new footbridge has been promised for many years for the River Hull (West Beck). The County Council are now reluctant to provide this. If it is still missing, use the diversion and let the council <sup>know of your</sup>concern!*
- 3. The Nature Reserve at Top Hill Low is being steadily developed. It is open daily during the summer and on winter weekends. Try not to disturb wildlife or twitchers along this section of the Hutton Hike!*

*Wishing you good walking,*
