

THE FIFTH "WINTER TANNERS" WALK held on Sunday January 6th 1980

In contrast to the '79 walk when there was snow and ice in abundance, this year the weather was fine and almost Spring-like. Although there was no check on how many actually started from Leatherhead it is thought to be over a hundred which is a record. Most finishers did as requested and supplied their finishing times but a number of others did not and are therefore not included below. Also there may be a few anomalies in the times because some people deducted the four minutes (late start) and others did not.

Years ago it was considered something of a feat to complete the (July) Tanners Marathon within seven hours but now we have "walkers" beating this time by a considerable margin - even in January. And as for beating five hours which is seldom done even in July .....

The route was successfully proved and will be used for the "real" event in July when there may well be another thousand walkers. Those that completed this Winter walk should be up to tackling the "Fifty"
